Recommendation Letter

The Russian-Kazakhstan uranium mining Joint Venture "Akbastau", a division of JSC NAC "Kazatomprom", was established on 12th October, 2006 for the exploration of Blocks №1, 3 and 4 of the Budenovskoye uranium deposit in the Sozak region of Southern Kazakhstan.

The company's active growth and expansion lead to the need for additional office space, as a result of which the Company's Top Management made the decision to relocate. "Scot Holland | CB Richard Ellis" was chosen as the service provider in the process of selecting new office premises.

Working together with the team of experts of "Scot Holland | CBRE" gave us a chance to recognize their level of professionalism, deep knowledge of the local property market, efficiency in meeting all of our requirements, and striving to achieve maximum results.

We consider the overall result of our cooperation as very positive, and are highly satisfied with the level of quality of the rendered services.

We recommend «Scot Holland | CBRE» as a highly professional and reliable partner for selecting office premises and representing the Client's interests during negotiations with property owners, with the ultimate goal of achieving the most favourable lease conditions.

Sincerely,

Dmitry Magazov
General Director
"Akbastau" Company
